DETAILED ACTION

Allowable Subject Matter

1. **Claim 1, 3-5, 7 and 8**, renumbered as claims 1-6, respectively, are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose the use of a "further plurality of chained stream processing circuits" having "a router circuit...the router circuit having a first, second and third output, coupled to an input of the shareable communication structure, an input of the further shareable communication structure and a second external connection terminal of the electronic signal processing circuit respectively, the router circuit being arranged to establish selectable connection patterns between its inputs and outputs under control of the control circuit.", as required by independent claim 1. That is, the closest prior art of *Srikanteswara*, as discussed in the Final Office Action, dated 1 November 2010 discloses the use of a test rail [i.e. "a shareable communication structure"] for connecting a set of processors, but does not disclose the use of streaming processors. *Marinissen I* is used to cure this deficiency by showing that it is known to connect sets of processors as a set of "stream processing circuits". However, neither *Srikanteswara* or *Marinissen I* disclose or suggest the use of two distinct groups of stream processors, each with an individual test rail/shareable communication structure, interconnected by a router circuit to each other and to an external communication structure, as required by claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the

issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
